

ECMO MOBILIZATION FOR REHAB PROFESSIONALS

PHYSICAL THERAPY
(PT) CORE COMPETENCY

About Us

ECMO Advantage and **PT Core Competency** have partnered together to address the lack of formalized education and training for rehabilitation professionals caring for patients supported on ECMO. We offer a comprehensive educational experience that focuses on the key clinical rehab concepts necessary to provide safe management of ECMO patients. Combining high quality didactic education and high fidelity simulation can help ease uncertainty and create clinical confidence leading to better patient care as well as better patient outcomes.

About Us

ECMO Advantage has a desire to expand the ECMO capabilities of hospitals and clinicians in an effort to make safe and effective ECMO treatment more widely available.

Utilizing a combination of online learning, scenario-based training, and high fidelity simulation, ECMO Advantage provides expert instruction at their state-of-the-art ExtraCorporeal Education Center, also known as EC2.

Additionally, ECMO Advantage can bring this time-tested and proven ECMO education to your institution, help you build a program from the ground up, and provide you with highly-skilled and experienced ECMO Specialists to meet your ECMO staffing needs.
